

# Termination of Deep Space

Sumanto Roy\*

Class XI Student, Navanalanda High School, Kolkata, India

**Abstract:** An interesting theory that shows how vacuum can determine the end of Deep Space.

**Keywords:** Deep space.

## 1. Introduction

There are a lot of conspiracies that outer space is infinite. But there is an end to outer space since everything that starts has to have an end.

## 2. Observation

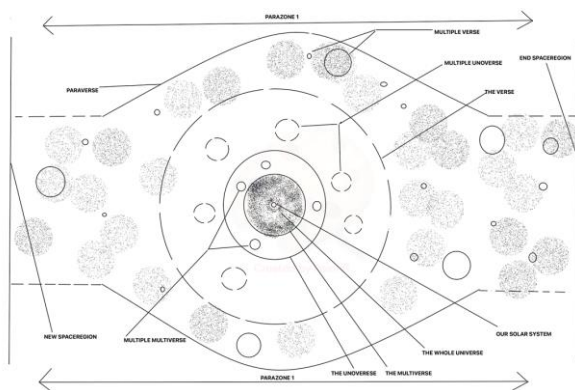

Fig. 1.

With the help of the above picture, I will introduce some new concepts towards space theories.

### A. Basic Theories

We are all aware of our solar system which is inside the Milky Way galaxy. It is common to everyone. Also Milky Way is not only a galaxy inside our universe together as a whole, there are lots of other galaxies inside our universe.

### B. The World beyond Universe

#### 1) Part I

We should refer the Universe as a whole from the above picture. Now there will be multiple Universe further in deep space. Since Technology is not so advance, we cannot prove that, but I believe that, as we are taking our Solar System as a part of Universe including multiple galaxies, stars, nebulae, black hole, the Universe as a whole will be a part of something known as Multiverse.

#### 2) Part II: Multiverse

The Multiverse contains numerous number of Universe as a part of it. So the basic idea is that If we consider the universe as

a solar system if that multiverse, the multiverse as whole will be the part of something called as Uno-verse.

#### 3) Part III: Uno-verse

The Uno-verse similarly will have multiple Multiverse including multiple universe with further division of planets, galaxies, stars, as part of 'one' Uno-verse. Again, if we consider the Multiverse as a Nebula for example (not Solar system this time for repetition) for that Uno-verse's part, the whole Uno-verse will be a part of something called Verse.

#### 4) Part IV: Verse

The Verse will have a different stage than others. Now we have good resource of the Deep Space. Till Uno-Verses Gravity, Speed, Time, etc. will have existence. But beyond the Multiple Uno-verse, when we will enter the Verse, speed, time, gravity will slowly have no existence beyond this point. Also like the Uno-verse, Verse will also be a part of something which will have multiple Verse with Uno-verses, Multiple-Multiverses, Multiple Universes, etc., as a whole in it, and I call it Para-Verse.

#### 5) Part V: Para Verse - The End

The Para Verse is the end of all Verses. This region is so much extreme that, the pressure of Vacuum will be thrice or quadrupled than the speed of light. From this point till Parazone-1, there will be no existence of Speed, Time, Gravity, etc. What will only exist is mass of an object.

The Mass of an object will determine whether the object will move backwards or forward toward New space region or Back space region or it will free fall to opposite Parazone -1 or it can be Static, commonly as stationary.

Now, many of us might think that since Verse is a part of Para-verse, can the Para-verse be a part of similar thing. No, it cannot since there will be no existence of speed, time, gravity and pressure of vacuum will be thrice or quadrupled than the speed of light.

## 3. Conclusion

Thus we come to this conclusion that end of Space can be determined with the help of Vacuum and each universe can be classified into deeper exploration of the total types of different Verses, including Multiple Multiverse, Para-verse, Uno-verse.
